

Description of the department's policies for dental clinics and laboratories

- 1- Preparing qualified students to practice the profession of dentist and making the most of the opportunities available in the department that blend theoretical trends and practical reality in dental sciences
- 2- Providing a high level of clinical training in the various specialties of dental treatment through the use of the latest medical equipment to practice diagnostic skills and clinical treatments for patients.
- 3- Educating students on professional humanitarian work and enhancing and consolidating professional and ethical values among students practicing the dental profession to enable them to keep pace with modern scientific developments in dental sciences.
- 4- Developing students' sense of responsibility during the study period and in the field of work and enhancing the spirit of cooperation and teamwork.
- 5- Enabling students to acquire work skills in medical laboratories.
